CAREER OBJECTIVE

Computer Science and Design undergraduate with hands-on experience in web development, AI-powered applications, and modern software technologies. Skilled in Python, JavaScript, React, Next.js, and problem-solving, with experience building intelligent applications, responsive web platforms, and interactive user experiences. Eager to apply technical skills, contribute to innovative projects, and continuously learn emerging technologies.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, Java, C, C++

Web Technologies: HTML, CSS, React.js, Next.js, Tailwind CSS, Streamlit

Databases & Backend: Supabase, PostgreSQL

AI & Tools: Ollama, CodeLlama, DeepSeek-Coder, Mistral, Tesseract OCR, gTTS

Tools & Platforms: Git, GitHub, Visual Studio Code

Core Concepts: Responsive Design, Problem Solving, UI Development

INTERNSHIP EXPERIENCE

Tomercon Developers LLP – Short-Term Online Internship (2 Weeks)

- Gained practical exposure to website design fundamentals using HTML, CSS, and JavaScript.
 - Explored the impact of Artificial Intelligence on modern resume building and ATS-based CV screening systems.
-

PROJECTS

AI Code Explainer

- Built an AI-powered code explanation and debugging application using Python, Streamlit, and Ollama.
- Implemented automatic language detection, error analysis, and conversational AI support.

Skill Enhance – AI-Powered Educational Platform

- Developed an AI-based learning platform with OCR and text-to-speech capabilities.
- Integrated local AI chat and study tools to assist students in learning.

Mellow – Skincare E-Commerce Platform

- Built a skincare shopping application using React, Next.js, and Supabase.
- Implemented a coin-based reward system to provide customer discounts.

JobFlow – Job Application Tracker

- Developed a web application to track job applications and upcoming opportunities using React, TypeScript, and Tailwind CSS.
- Implemented status tracking, search and filter functionality, dashboard analytics, and a responsive user interface.

VR-Based Computer Hardware Tour

- Created an interactive VR environment for computer hardware exploration.

Personal Portfolio Website

- Developed a modern portfolio website using Next.js, React, and Tailwind CSS with smooth scrolling and interactive animations.
- Integrated Framer Motion, GSAP ScrollTrigger, Lenis, and Nodemailer to create an engaging user experience and contact functionality.

EDUCATION

B.Tech – Government Engineering College, Kozhikode

Semester: S7

CGPA: 8.49

Higher Secondary – Rahmania HSS

97%

2021 – 2023

High School – BEM GHSS

100%

2020

CERTIFICATIONS

- Python for Data Science – NPTEL
 - Introduction to Front-End Development – Meta (via Coursera)
-

LEADERSHIP & ACTIVITIES

- NSS Volunteer
 - IEDC Member
 - Participated in Hackathons
-

LANGUAGES

English, Malayalam, Hindi
